

COVID-19 CORONAVIRUS

5 STEPS OUR PRACTICE IS TAKING...

- 1 Any team member who is sick is staying home.
- 2 Sanitizing equipment and patient contact surfaces after every use and again at the end of the day.
- 3 Eye doctors and pre-testers will wear personal protective equipment when treating patients.
- 4 Our team members wash their hands after contact with each patient and throughout the course of the day.
- 5 We have sanitizing stations in our office.
