

How we are keeping you safe and battling COVID-19:

- Proper masks are still required in our office.
- “No touch” hand sanitizer stations throughout the practice.
- Pre-appointment phone calls for screening/notes to reduce amount of time in the office implemented and continue.
- Automatic temperature checks for patients and employees upon entering office.
- UV-light ventilation sterilization systems to HVAC system in our Jupiter office and WPB (5th floor) office.
- Air purifiers installed in clinic.
- Touchless check-in and check-out.
- Social distancing and limiting non-essential people in the building and common areas as well as enforcing visitation restrictions.
- Encouraging of frequent hand washing protocols.
- Procurement of BD Veritor™ Plus System as a rapid COVID-19 detection system for screening of higher risk patients on arrival to the Center on the day of surgery.
- Implemented Virtual Waiting Room.

Sincerely,

Hugh Glatts
Practice Administrator

We continue to update our protocols to meet or exceed the CDC and Florida Department of Health to keep everyone safe from COVID-19

While no measure is a guarantee, we hope these additions to our infection control measures will improve the safety to you, our staff and community.

REVISED April 2021
